

IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. – 5. (Cancelled).

6. (Currently Amended) An image display apparatus comprising:

an image display element;

an observation optical system which has a positive refracting power and which forms an exit pupil for observation of an image displayed on said image display element; and

~~a clip section;~~

~~wherein said observation optical system has a positive refracting power, and a frame member provided with said observation optical system is integrally formed with said clip section~~

a frame member supporting the image display element and the observation optical system and having a clip section, the clip section being removably attachable to a user's spectacle frame.

7. – 34. (Cancelled).
